

karan

LINKEDIN SUMMARY

I am an aspiring software developer with a strong foundation in building scalable applications. Through my recent technical training and projects, I have developed proficiency in Python for backend development and React for creating responsive, user-friendly front-end interfaces. I am also experienced in leveraging AWS cloud services to deploy and manage robust software solutions. My focus is on writing clean, efficient code and solving complex technical problems through logical, iterative development. I am passionate about staying current with emerging technologies and applying best practices to build high-quality software that meets user needs. I thrive in collaborative environments where I can contribute to team goals while continuously expanding my technical skillset. I am eager to apply my knowledge of full-stack development to a challenging role where I can grow as a developer and contribute to impactful projects. I am currently seeking entry-level software development opportunities. Please feel free to reach out if you would like to connect or discuss potential openings.
