PROFESIONAL SUMMARY

Final-year MCA student and aspiring Python Developer with hands-on experience building production Python applications with Django and Flask, integrating REST APIs, and designing relational databases. Took a project from concept to real-world deployment, including a clinic management system currently in active use by a practicing doctor. Consistent academic record (Rank 1 in BCA; 9.12 CGPA) with a strong grasp of Data Structures, Algorithms, and Object-Oriented Programming. Seeking a Python Developer role to build and scale production-grade systems.

EDUCATION

Master of Computer Applications (MCA) — LJ University, Ahmedabad

Expected 2027 | SGPA: 9.65 (Semester 2) — Currently Pursuing

Bachelor of Computer Applications (BCA) — Veer Narmad South Gujarat University

2025 | CGPA: 9.12 — Rank 1 in BCA (Final Result)

Higher Secondary (12th) & Secondary (10th) — CBSE

12th: 92.6% | 10th: 88%

TECHNICAL SKILLS

Languages: Python, Java, C++, C, Kotlin, PHP

Python Frameworks: Django, Flask

Web: HTML, CSS, JavaScript

Other Frameworks: Laravel, Flutter

Databases: PostgreSQL, MySQL, Oracle, SQLite

APIs & Integration: REST API design & integration, Gemini API

Tools & IDEs: Git/GitHub, VS Code, IntelliJ IDEA, Visual Studio 2022, Android Studio

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

PROJECTS

AI Interview Questions Generator — *Django, Python, Gemini API*

- Built an AI-powered Django web application generating interview questions via the Gemini API, configurable by role, format (MCQ/Q&A), count, and difficulty
- Implemented user registration with email verification, answer-reveal toggle, session history, and per-session PDF export

Clinic Management System — *Deployed in Production*

- Developed patient record management and medicine inventory modules; implemented prescription/medical history storage and bill generation with payment tracking, backed by a PostgreSQL database
- Added profit history tracking and reporting — currently deployed and in active use by a practicing doctor

Online Attendance Management System — *Flutter, Python, MySQL, Android Studio*

- Built a geofenced, face-recognition attendance system in Python with multi-role authentication for Admin, Faculty, and Student users
- Designed faculty-generated 4-digit session codes restricted to a geofenced radius, with real-time attendance percentage and history reports

CERTIFICATIONS

- Python 3 from Beginner to Expert — Learn Python from Scratch Specialization (Coursera)
- Advanced Python and Professional Development (Coursera)
- Databases and SQL for Data Science with Python (Coursera)
- Advanced Data Structures and Algorithms (Coursera)
- Object Oriented Programming in Java (Coursera)
- Git and GitHub Complete Master Class Specialization (Coursera)
- HackerRank: Python (Basic), SQL (Basic, Intermediate, Advanced), Java (Basic), C# (Basic)
