

karan

LINKEDIN SUMMARY

I specialize in software development using Python and Java. My work focuses on building reliable, clean, and efficient code to solve complex technical challenges and support robust applications. Driven by a passion for continuous learning and problem-solving, I enjoy collaborating with teams to deliver high-quality software solutions. Whether working on backend logic, application development, or streamlining workflows, I am dedicated to leveraging the strengths of both Python and Java to build scalable, functional technology. I am always open to connecting with fellow developers, tech professionals, and recruiters regarding new opportunities and technical collaborations. Feel free to reach out.
